01.10. – 30.11.2026

Introducing: American Eagle Glacier™

The sharpest blade we have ever made.

Advanced blade geometry meets sharpen-free XP² Technology™. Effortless calculus removal with every stroke.

The Glacier™ tip (patent pending) features a precise groove along the facial surface and an optimised blade geometry, ensuring a **particularly sharp cutting edge** – permanently. Glacier™ allows you to work fatigue-free and without pressure, delivering more effective scaling and perfect adaptation of the working end.

As Glacier is based on **XP² Sharpen-Free Technology**, this edge **never needs to be sharpened**. It maintains its peak performance even longer than our standard XP² instruments – stroke after stroke, patient after patient.

93%*
of all surveyed DHs would recommend this instrument and rate it 4.8 stars!

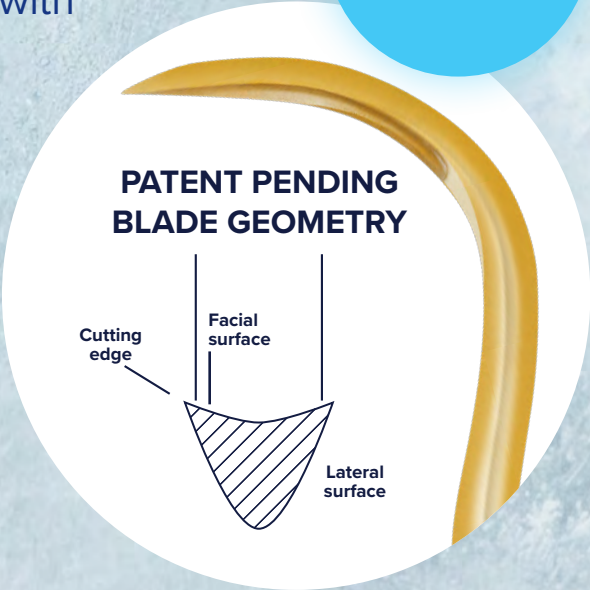

4.8 ★★★★★

*Based on a consumer perception study with 48 people after 6 weeks.

Interchangeable tips save money and reduce waste

- ✓ With sharpen-free XP² Technology™
- ✓ Once the working ends wear out, the handle remains in the practice
- ✓ Only the two tips need to be replaced
- ✓ The assembled instruments can be easily reprocessed in a thermal disinfectant

Quik-Tip®

American Eagle XP² Technology™

Sharpen-free scalers and cures

Easy navigation in periodontal pockets and interproximal areas thanks to **slimmer, precision-crafted working ends.**

Gentle yet effective scaling: calculus and hard deposits are removed layer by layer with “shaving” strokes – for a treatment that is gentle on patients and practitioners alike.

✓ **No sharpening and more time for what matters most: your patients!**

DryTips®

The ultimate saliva control

DryTips® are ideal for impressions, orthodontics, composites, fissure sealants, fluoridation and more, as they reliably contain saliva. **One DryTip replaces up to 6 cotton rolls.** In addition to effectively covering the parotid duct, they provide **optimal protection for the buccal mucosa, during air polishing and machine-assisted work (e.g. ultrasonic instrumentation).**

Transform™

Heat Mouldable Impression Trays

Transform Impression Trays are made from a heat mouldable material. Create one-step custom-trays chairside for greater efficiency and profitability.

- ✓ Quick and simple. Can be moulded with hot water in less than 60 seconds at chairside
- ✓ Facilitates impressions where unusual soft tissue, bone shape and tooth position exist
- ✓ Extremely strong, enhanced anatomical shape. Good retention slots.
